

ASSIGNMENT 216 TASK 3 PRACTICAL ASSESSMENT

Task 3

Demonstrate to your tutor how to administer preventative care for two animal species agreed with your tutor.

As part of your task you must also check both animals for visual signs of ectoparasites and explain what you are looking for.

Conditions of assessment

You must carry the task out on your own, under supervised conditions. You must ensure your own and the animal's safety and wellbeing at all times. If your tutor observes any unsafe practices they will stop the assessment.

Handout and Worksheet

Endoparasites and Ectoparasites
